

The Utah State Tax Commission has developed a downloadable Taxing Jurisdiction Database for use in identifying the taxing jurisdictions in which service is provided for determining Municipal Telecommunications License Tax (MTLT) and E-911 fees.

This file includes taxing jurisdictions in Utah and should only be used to determine those taxing jurisdictions based on your customers' zip + 4 billing address. Use the data to identify those jurisdictions in which you provide service to, based on the customers primary address. Also included in the downloadable file is a README.TXT file for an explanation of the data file and the database format.

To utilize this data, match your customers to their taxing jurisdictions using the zip+4 code as a composite key field. The special tax district codes correspond to taxing jurisdictions.

## Additional Information

- [Municipal telecommunications license tax \(MTLT\) and E-911 fund information](#)
- [Pub 62, Sales Tax Information for Telecommunications Service Providers](#)
- [Current sales and use tax rates](#)
- [Sales & use tax rate changes](#)

## Explanation of Files

The following files are for telecom companies to use in database applications. These files won't work in spreadsheet applications such as Excel.

To save a file, you may need to right-click and save the file to your computer.

Tax Filing Periods
